

AGRI RX

The Agri RX units are radio receivers, and their function is to enable the wireless control of pumps and valves .
The standard power source for the units is a 3.6 V lithium battery, with a life span of 1 year, depending on the correct usage of the product. This is one of the features that makes them practical , reliable, and perfect for use, even in remote areas .
The units offer their own testimony, they have been hard at work in several farms, all over South Africa

Control up to 4 individual valves

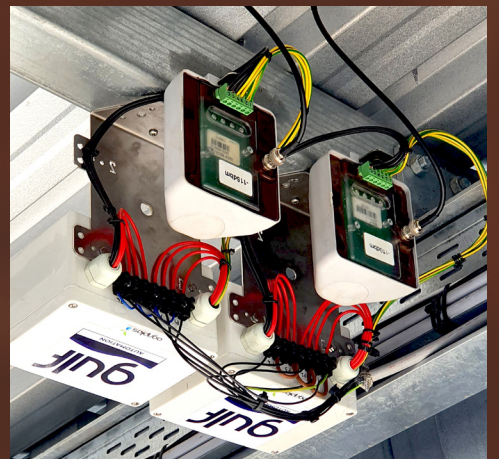

Can be combined with a latching relay to energize a pump contactor

IP65 Splash proof

Battery operated

Solar panel options available

Reliable AM Signal, not affected by line of sight
